

# ChatGPT

This is an old revision of this page, as edited by [ElijahPepe \(talk | contribs\)](#) at 02:20, 6 December 2022. The present address (URL) is a permanent link to this revision, which may differ significantly from the current revision.

**ChatGPT** is a prototype [artificial intelligence chatbot](#) focused on [usability](#) and [dialog](#). Developed by [OpenAI](#), it uses a [large language model](#) based on the [GPT-3.5](#) architecture.

Launched in November 2022, ChatGPT is a sibling model to [InstructGPT](#).<sup>[1][2][3]</sup> It has been noted for its accuracy and detail.

## Features

ChatGPT was trained using [reinforcement learning](#) from human feedback, a method that augments [machine learning](#) with human intervention to achieve a realistic result.<sup>[4]</sup> During the training process, human trainers played the role a user and an artificial intelligence assistant.<sup>[5]</sup>

## Reception

According to [The Guardian](#) it is able to generate "impressively detailed human-like written text."<sup>[6]</sup> After using the bot on a student assignment [Dan Gillmor](#) considered the output to be on par with what a good student would deliver and opined that "[a]cademia" would have "some very serious issues to confront" in the future.<sup>[3]</sup>

In December 2022, the question and answer website [Stack Overflow](#) banned the use of ChatGPT for generating answers to questions, citing the factually ambiguous nature of ChatGPT's responses.<sup>[7]</sup>
